Building Fire Flow Requirements: _____ GPM for a duration of _____ Hours

The Owner/Developer of the proposed commercial project hereby applies for any service line extensions and connections for water service and fire protection water supply from Eudora Utilities Association, Inc. in accordance with the “Rules, Regulations, Policies, And Procedures of Eudora Utilities Association, Inc. of DeSoto County, MS”.

This application is subject to the following requirements and conditions:

1. Applicant shall furnish a master layout of the commercial development from the project's engineer to include water/wastewater utility locations (existing and new), fire protection water mains (line extensions or fire loops to meet required distances), and hydrant locations. This plan will be reviewed by the Eudora Utilities Association in conjunction with Eudora Volunteer Fire Department for approval.
2. All preliminary and construction engineering and construction costs shall be paid for by the Owner/Developer.
3. Any required system water main upgrades or additional water mains shall be paid for by the Owner/Developer.
4. All easements required must be secured by and at the expense of the Owner/Developer.
5. All water service is subject to the tariff and service rules and regulations of the Association as the same may be amended and changed from time to time.
6. The construction is expected to begin on or before: _____
7. The Developer shall be responsible for payment of System Development Fees, which are at present \$1,000. This fee is required to be paid before any construction begins pertaining to connection of the Eudora Utilities Association's Water System.
8. Any Special Conditions for your commercial project: _____
